

Please leave New Jersey's "Do Not Call" program alone. I do not want to hear from telemarketers. They are an invasion to my privacy and do not have anything I want to hear about. It is annoying to come home and finding several unwanted messages on my machine. I won't buy anything from them so they are wasting their time and mine.

What happened to government for the people? NO one in New Jersey wants this law overturned. You should pay attention.
